**RCN-TW-E2**
**FDTW90-140**
**Individual flap control system**

We've optimised our outlet design with advanced technology to allow you to control up to four directions of air flow. Allowing you to control air direction via the flap systems and room temperature.

The flap can swing within the range of upper and lower flap position selected with wired control.

\*The wireless remote control is not applicable with the individual flap control system.

**750mm Drain Pump**

The drain discharge system allows for a piping layout with a high degree of freedom (dependent on installation location). Discharge from above 750mm from a ceiling surface to the indoor unit.

**Installation workability**
**Drainage spout**

Drainage flow test can be done easily by use of this drainage spout.

**Transparent access hole to drain pan**

Condition of the bottom of a drain pan can be checked through this transparent access hole without removing drain pan.

**Motion Sensor**
**(Option)**

Motion sensor is equipped in the corner of the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

1. The data are measured under the following conditions(SO-T1). Cooling: Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating: Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

2. Sound pressure level indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
